### **DETAILED ACTION**

Examiner acknowledges receipt of request for extension of time and notice of appeal filed 09/24/03; request for continued examination filed under 37 CFR 1.114, request for extension of time, amendment and remarks, al filed 01/27/05.

#### ***Response to Remarks***

Applicants indicate that claims 28 and 34 are amended, but no preliminary amendment was filed with the RCE. Examiner respectfully requests clarification and comments on the amendment of claims 28 and 34.

#### ***Continued Examination Under 37 CFR 1.114***

1. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicants' submission filed on 01/27/05 has been entered.

However, because the new claims are directed to many species, an election according to the requirement below is made to enable a reasonable search of the claimed inventions.

#### ***Election Requirement***

2. This application contains claims directed to the following patentably distinct species of the claimed invention: The solid permeable resin of the microcapsule of claim 28 and the process of claim 34 comprise (a), isocyanate polymerization product or (b), polymerization product of urea formaldehyde. Each of the polymerization product contains surface modifying compound

Art Unit: 1615

that is defined by formula (IA) to (IVA) and sulfonate polyester polyol having hydroxyl number ranging from 150-170.

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species, product and process of making the product, for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, claims 28 and 34 are generic.

In either election, that is, election of (a) or (b), applicants are required to elect a single disclosed surface-modifying compound that is completely defined by single Z/X/Y/R/L. Furthermore, regarding claim 34, the process of (a) or (b) should be elected making sure that the polymer resin, which is prepared is completely defined by single a Z/X/Y/R/L as discussed immediately above.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and **a listing of all claims readable thereon**, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to

Art Unit: 1615

be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

3. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Blessing M. Fubara whose telephone number is (571) 272-0594. The examiner can normally be reached on 7 a.m. to 3:30 p.m. (Monday to Friday).
